

NOSSA

An established part of the handmade lampshade world since 1960, Nassi tells the story of 3 generations of women. It weaves together the skills of artisan workmanship with the exploration of design vs. everyday objects.

These lamps are made in Puglia, in southern Italy, and have a connection to a land that is dry and brimming with symbols, a land that is poor and warm, hard and poetic. Nassi connects the traditional classic lampshade with pure shapes, the pleasure of filtered light with the quality of particular materials, reducing and refining to arrive at a new romantic rationalism.

Our terracotta bases are meticulously handcrafted. These details bear the signature of a local artisans family. They have been working for generations with terracotta in this time-honored way, preserving a tradition that infuses every lamp with rural soul and character. These raw manufactures are sanded, polished and beewaxed providing an enhanced leather-like finish. The marks of craftsmanship — such as imperfections, scratches, wear, and dents — are not flaws but distinctive features that make each piece truly one of a kind.

Capanni wall lamp

Capanni wall lamp

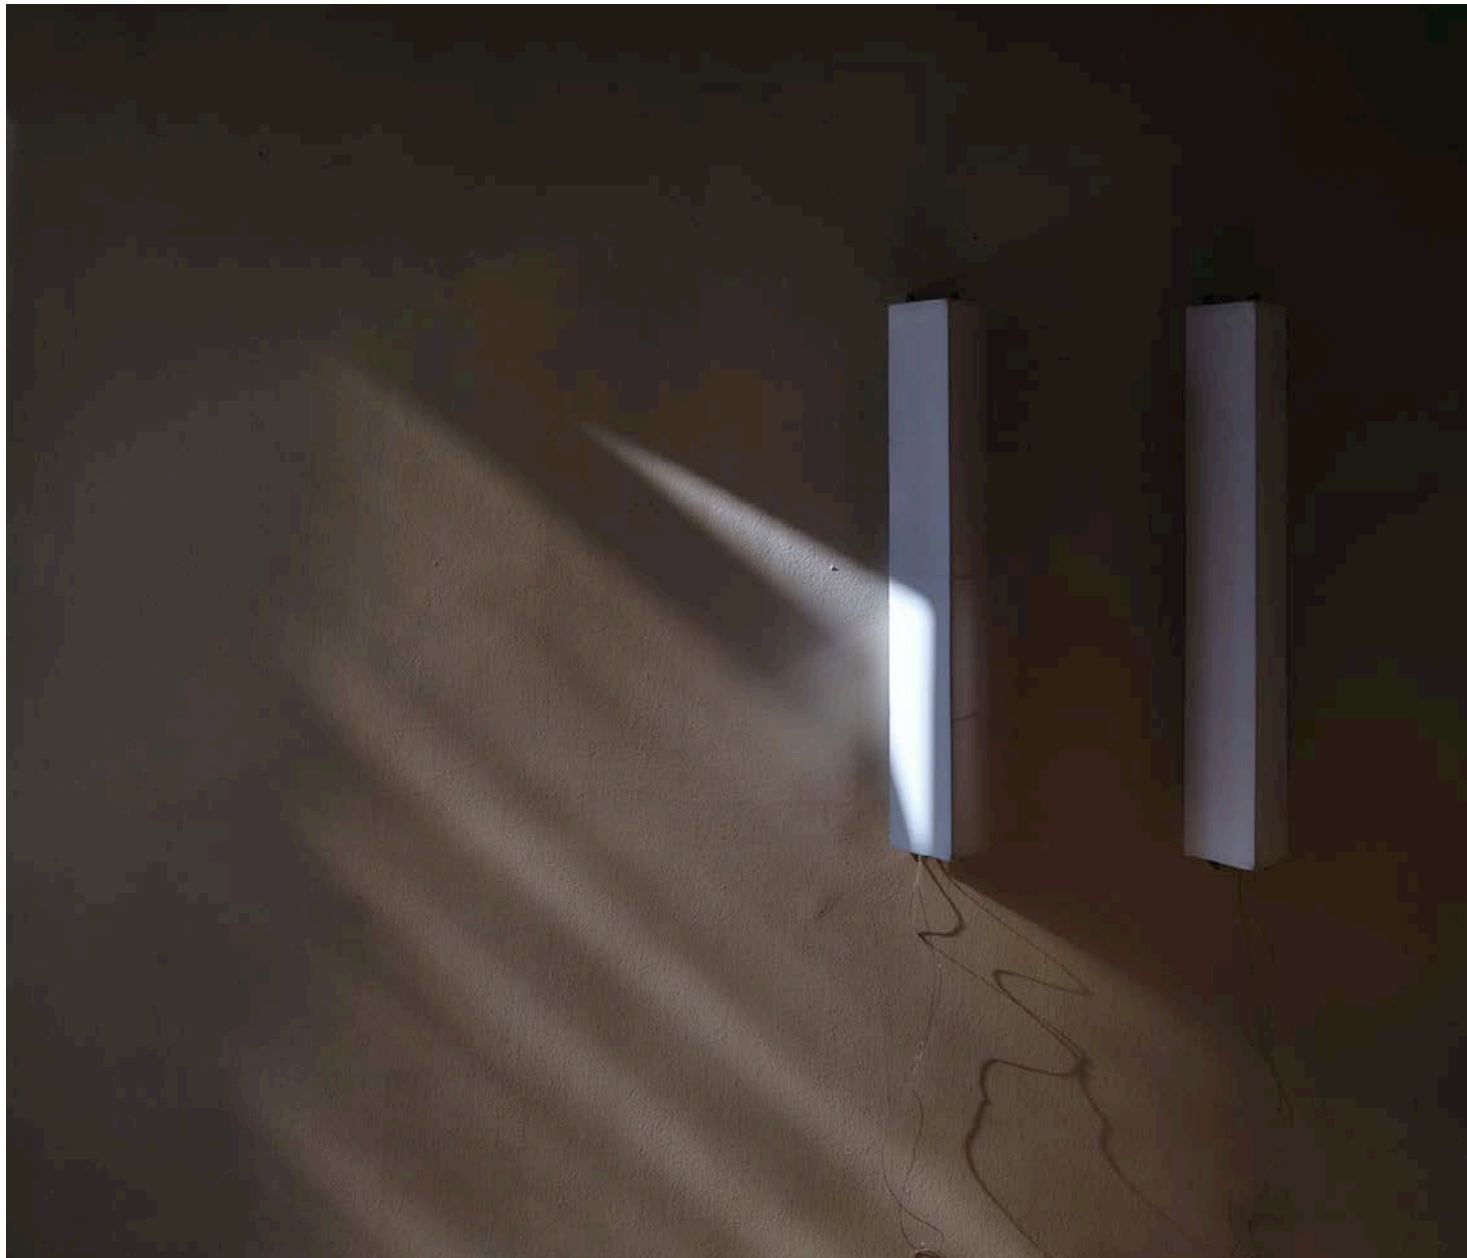

Like shelters made of light, these lamps draw from the humble elegance of temporary architectures. Two stainless steel brackets support a linen skin — in five shapes — revealing the structure that gives it form. Between fabric and light source, a luminous space opens up: soft, shifting, inhabited. Whether wall-mounted, suspended or ceiling-fixed, each Capanno defines its own atmosphere.

Capanni wall lamp

The light source inside the lamp is a cylindrical aluminum LED profile with a warm light at 2700 K, enclosed in a plexiglass tube with aluminum end caps that protect against dust and moisture. This refined detail enhances and completes the lamp from the inside as well. Available either as a hardwired version for wall installation or as a plug-in version with an external cable and visible switch.
Available in white. Other colors on request.

Miramare hanging lamp

Miramare hanging lamp

Originally designed in 2021 for the Miramare Hotel in Ischia, this lamp has watched the sea from a guestroom window all year round. With its stainless steel structure, it sways gently in the breeze, learning from sunsets to cast a warm, embracing light. Now reimagined in a new version: light linen shades and a custom designed LED ring a fresh softness to its timeless presence.

Chimera

Chimera is a lamp made of fragments, like our desires: different, contradictory, light or profound, yet all present together. It is a wish, a celebration, a good-luck charm. An object inspired by the ancestral symbols of abundance and good fortune. The fragments are reminiscent of Etruscan clay ex-votos, crafted from simple materials that gain value through the meaning they carry and the skill with which they are shaped. Limited edition of 10 pieces.
